

Amey Construction

Ref: Neville Keeling

The last job Nev carried out for me was on the high profile River Irwell job
Pipeline 700 mm welded steel.

Which under tremendous pressure his professionalism was 1000%.

He is one of the best welder's I have worked with; I have been in the pipeline industry for
over 24 years. He himself is a polite and trustworthy welder with enormous experience and
also his staff are the same his product was installed and played a major part in this operation.
If you have any queries please don't hesitate to contact me.

Many many thanks
